

4.2 Weekly log (Technical Details of Activities)

Name of the Student: Homanath Adhikari Khatri

Date:2026/05/31

Project/Job Title: UI/UX Design Intern

Week Number: 1

Responsibilities:

- Learn the basic tools and features of Figma.
- Understand fundamental UI/UX design principles.

Activities:

- Explored fonts, typography, and color theory.
- Learned about design effects and visual elements.
- Practiced creating prototypes and screen interactions.

Observations:

- Basic understanding of Figma tools and features.
- Introduction to prototyping and interactive design.
- Understanding of fundamental UI/UX design principles.

Plan for Next Week:

- Explore advanced UI design styles and concepts.

Performance Appraisal by Mentor:

Showed good Interest in learning and completed the task well. They can improve further by practicing more

Name of the Student: Homanath Adhikari Khatri

Date:2026/06/09

Project/Job Title: UI/UX Design Intern

Week Number: 2

Responsibilities:

- Learned modern UI design concepts and styles.
- Apply Glassmorphism and Neumorphism to a design.

Activities:

- Practiced using blur, transparency, shadows, and depth effects.
- Applied the learned concepts to create a UI design.
- Explored the concepts of Glassmorphism and Neumorphism.

Observations:

- Improved knowledge of visual effects and shadows.
- Learned to balance visual appearance with usability.

Plan for Next Week:

- Improve knowledge of advanced Figma features.
- Apply UI/UX knowledge to a complete landing page design.

Performance Appraisal by Mentor:

Learned new concepts like glassmorphism with Interest and completed task on time

Name of the Student: Homanath Adhikari Khatri

Date:2026/6/16

Project/Job Title: UI/UX Design Intern

Week Number: 3

Responsibilities:

- Improve knowledge of advanced Figma features.
- Apply UI/UX knowledge to a complete landing page design.

Activities:

- Planned the layout and structure of the landing page.
- Designed the navigation, hero, and product sections.
- Applied appropriate colors, typography, and visual hierarchy.

Observations:

- Understanding of landing page design and structure.
- Improved skills in Figma and UI design.
- Learned the importance of visual hierarchy and consistency.

Plan for Next Week:

- Begin working on a real-world application design project.
- Understand the requirements and functionality of Lunar IT Solution website.

Performance Appraisal by Mentor:

Complete first UI with dedication and became eager to learn further.

Name of the Student: Homanath Adhikari Khatri

Date:2026/06/24

Project/Job Title: UI/UX Design Intern

Week Number: 4

Responsibilities:

- Understand the requirements and objectives of the Lunar IT Solutions website.
- Plan the structure and layout of the assigned website pages.

Activities:

- Analyzed the project requirements.
- Identified the structure of the Gallery and Internship pages.
- Planned the navigation and user flow for the assigned pages.

Observations:

- Understanding of website requirement analysis.
- Improved knowledge of website structure and user flow.
- Learned the importance of planning before starting the UI design.

Plan for Next Week:

- Create a wireframe for the Gallery and Internship pages.
- Plan the structure of the Enrollment page.

Performance Appraisal by Mentor:

Intern showed good progress in basic design and started working on complete web design.

---	--

Name of the Student: Homanath Adhikari Khatri

Date:2026/07/12

Project/Job Title: UI/UX Design Intern

Week Number: 5

Responsibilities:

- Create wireframes for the Gallery and Internship pages.
- Plan the structure of the Enrollment page.

Activities:

- Created wireframes for the Gallery page.
- Planned the layout and structure of the Internship page.
- Created the basic structure for Enrollment pages.

Observations:

- Understanding of wireframing and information architecture.

Plan for Next Week:

- Begin designing the high-fidelity UI design for the assigned pages.

Performance Appraisal by Mentor:

Created wireframe of project properly, now further need to work on visual design with proper research.

Name of the Student: Homanath Adhikari Khatri

Date:2026/07/22

Project/Job Title: UI/UX Design Intern

Week Number: 6

Responsibilities:

- Begin designing the high-fidelity UI design for the assigned pages.

Activities:

- Designed the Gallery page.
- Designed the Internship page.
- Designed the Enrollment page structure.

Observations:

- Understanding of design consistency.
- Learned the importance of reusable design elements.

Plan for Next Week:

- Complete the remaining assigned pages (Login and Enrollment).
- Improve navigation and interactions.

Performance Appraisal by Mentor:

Overall design structure was good, but need to work more on color formation and spacing.

Mentors' Approval

Name: Preksha Acharya

Date: 2026/07/29

Supervisors' Verification

Signature:

Name: Nabin Shrestha

Date: 2026/10/06

Name of the Student: Homanath Adhikari Khatri

Date:2026/07/30

Project/Job Title: UI/UX Design Intern

Week Number: 7

Responsibilities:

- Complete the remaining assigned pages (Login and Enrollment).
- Improve navigation and interactions.

Activities:

- Designed the Login page.
- Completed the Enrollment pages.
- Reviewed and improved the consistency of the assigned pages.

Observations:

- Improved skills in designing multiple connected pages.
- Understanding of consistent UI design.
- Learned the importance of reviewing designs.

Plan for Next Week:

- Add prototype interactions to the assigned pages.

Performance Appraisal by Mentor:

Previous work are updated properly and design are finalized properly, can work more to enhance design.

Name of the Student: Homanath Adhikari Khatri

Date:2026/08/10

Project/Job Title: UI/UX Design Intern

Week Number: 8

Responsibilities:

- Add prototype interactions to the assigned pages.
- Finalize the assigned pages.

Activities:

- Added prototype interactions to the assigned pages.
- Tested navigation and user flow.
- Reviewed and finalized the Gallery, Internship, Enrollment, and Login pages.

Observations:

- Improved skills in prototyping.
- Understanding of the complete UI/UX workflow.
- Learned the importance of testing and design refinement.

Plan for Next Week:

- Submit final project and documentation and present the completed work

Performance Appraisal by Mentor:

Overall, student showed proper design and interest during the worktime.
